Cisco Packet Tracer 8.2.2 release info

Cisco Packet Tracer 8.2 has been released in summer 2022 and is now available for download on Netacad website. Check Packet Tracer 8.2 new features. Packet tracer 8.2 adds a new OSPF command (**show ip ospf interface brief**) to the Packet Tracer 8.x serie, which added a new Packet Tracer Tutored Activities (PTTA) engine, as well as bug fixing and improvements on accessibility, usability, and security. The main new feature of Packet Tracer 8.x is the addition a new SDN Network Controller allowing emulated network programming through API exposed by Packet Tracer to the host. It is distributed as a debian package (.deb) for Ubuntu 20.04 and 22.04 LTS.

Cisco Packet Tracer 8.2 is created by Cisco Systems™ and is provided for free to everyone. Self learners are able to download Cisco Packet Tracer after registering on Cisco Netacad website. This is a major change in Cisco delivery policy for Packet Tracer as previous versions were only available for Netacad students and instructors.
